## Message from the Manager's Desk

Greetings to all!

School is the abode of learning.

It influences the all-round development of the pupils. Educators explore the possibilities in every individual child and make them capable enough to follow their pursuits. We aim to empower our students in such a manner that they act as representatives of a meaningful and value-based society.

Margaret Mead said, 'Children must be taught how to think not what to think.' Even as we impart education to the students to match the advancement in technology and globalization, we march our children ahead enabling them to think critically along with imbibing in them the Ignatian principles and ethos to meet the needs of the 21<sup>st</sup> century.

The e-mag, 'Ignited Minds Xpress' has certainly given wings to our students to explore their talents in various forms of art. I congratulate the editorial team for their hard work and dedication that has resulted in the publication of this issue of the school magazine.

Let us together groom the young minds of our students to enable them to walk the path of life successfully.

With warm wishes and God's blessings !

*Rev. Fr Dionysius Lobo S.J*  
*Manager*

## Message from The Headmistress' Desk

“Education is not just about going to school and getting a degree. It’s about widening your knowledge and absorbing the truth about life.”

The effort of every educator should be to unlock the treasure of knowledge and fill the students with curiosity and love for it. It gives me immense pleasure and delight to present before you the first issue of Vol 2 of our e-mag ‘Ignited Minds Xpress’. The objective of introducing an e-mag to our students is to help them hone their talents and showcase their creativity in not only academics and sports but also in the field of Arts, Performing arts, Creative writing and Critical thinking.

Children are like wet clay, you can mold them in any shape. They are quick learners and absorb everything around them with their audio-visual senses. It is our responsibility as potters to imbibe certain moral values in young children. Our mission is to provide enriching opportunities everyday so that students reach their full potential socially, emotionally, physically, and cognitively within the learning environment. This e-mag is just an effort in the said direction.

So, sit back and enjoy the creative inputs of our students and staff this year !

Happy Reading !

## My favourite Toy

I have a lot of toys,  
gifted to me by my  
parents. But out of all  
my favourite toy is  
doll. My  
grandmother gifted it  
to me . I call it  
"Dolly". She has a red  
dress and beautiful  
golden hair. When I  
go to bed my dolly is  
always besides me I  
love my little Dolly a  
lot.

Hobby is an activity which we do in our free time .

Games are very important in our life and it also makes us happy.

I like to exercise. It is my favourite hobby. Exercise keep us fit and fresh.

Also love to dance whenever the Music is played.

*Miss Abnoor Kaur  
Grade 2.1*

Dancing is an art,  
The floor is my  
canvas, And I am  
the brush, And  
whatever I create  
Comes from the  
heart.

I love to dance. I  
like classical dance  
Bharatnatyam. It  
gives me pleasure  
and happiness and I  
love to perform.

*Miss Swara Madhe  
Grade 2.1*

Paras Aushikar  
Grade 3-3

घड़ी समय दिखाती है।

मैं confuse होता हूँ।

जब लोग कहते हैं, "कल"

ये "कल" Future का काल है,

या ये "कल" Past का काल है।

इसलिये मुझे सिर्फ "Present"

पसंद है, Because

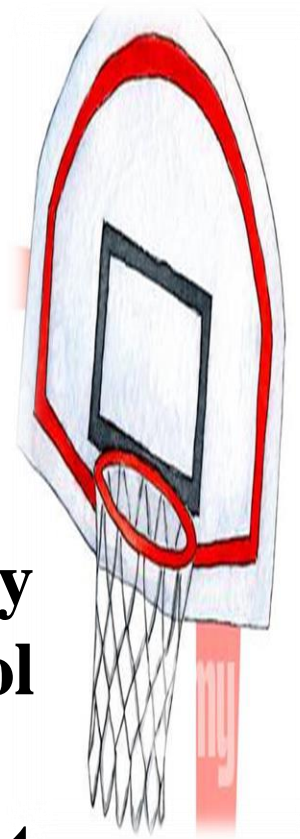

"Present is a Gift!"

# **My Favourite Sports**

## **“Basketball”**

- 1. My favourite sports is Basketball.**
- 2. I love to put the ball in the basket.**
- 3. I play the basketball with my friends after the school in the school ground.**
- 4. Basketball is an outdoor game, but I play at home regularly.**
- 5. My Sports Teacher, Sir Leo teaches me the basketball.**
- 6. My Sports Teacher also says to me that you are doing the dribbling very fast and nicely.**
- 7. I love to play basketball very much and it's my very favourite sports as well.**

*Mst. Rudransh  
Raut  
Grade 4.2*

## Information on Indian Navy

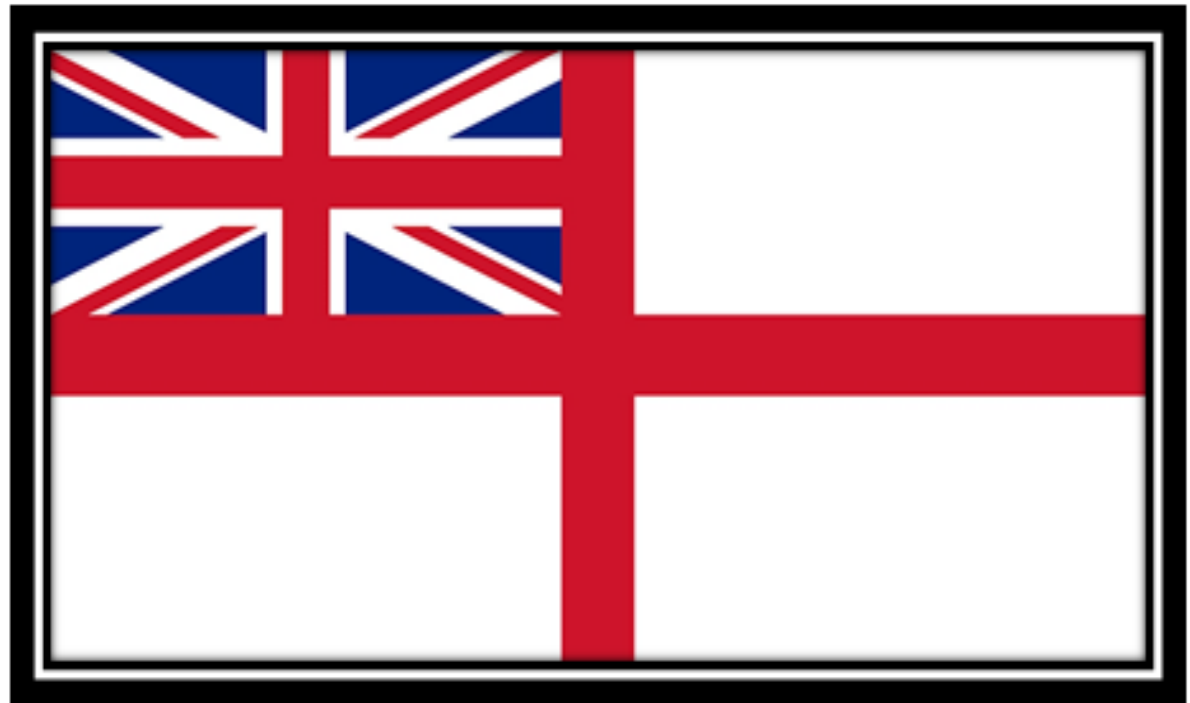

The small hour police of bit have a beginning of the 17<sup>th</sup> century to the one of the world's finest navy forces of the 21<sup>st</sup> century. The Indian navy has come a long way, it is a proud custorium of our rich marine time legacy and for years rank and the file of the navy has changed in its own civilization heritage.

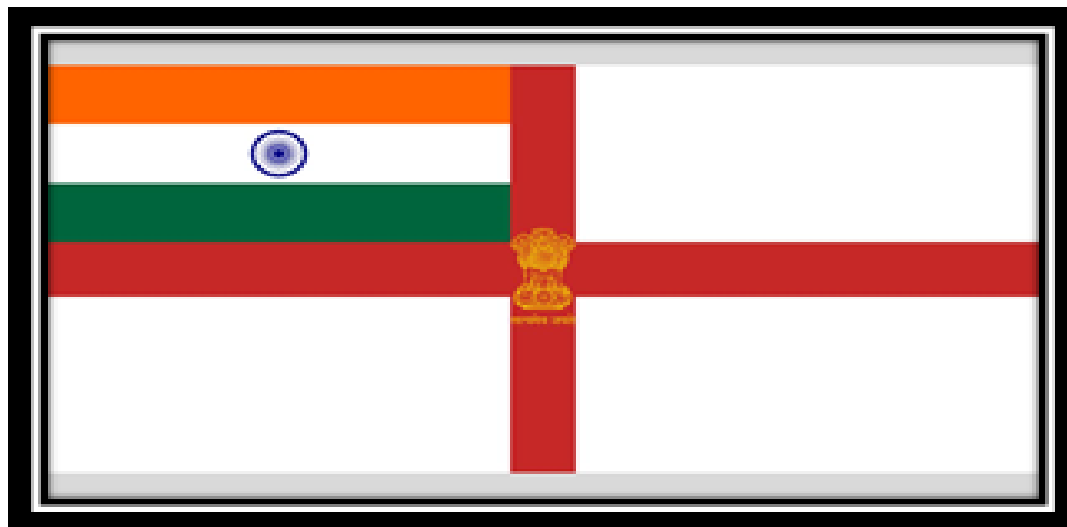

**INDIAN NAVY**

navy flag from 1947

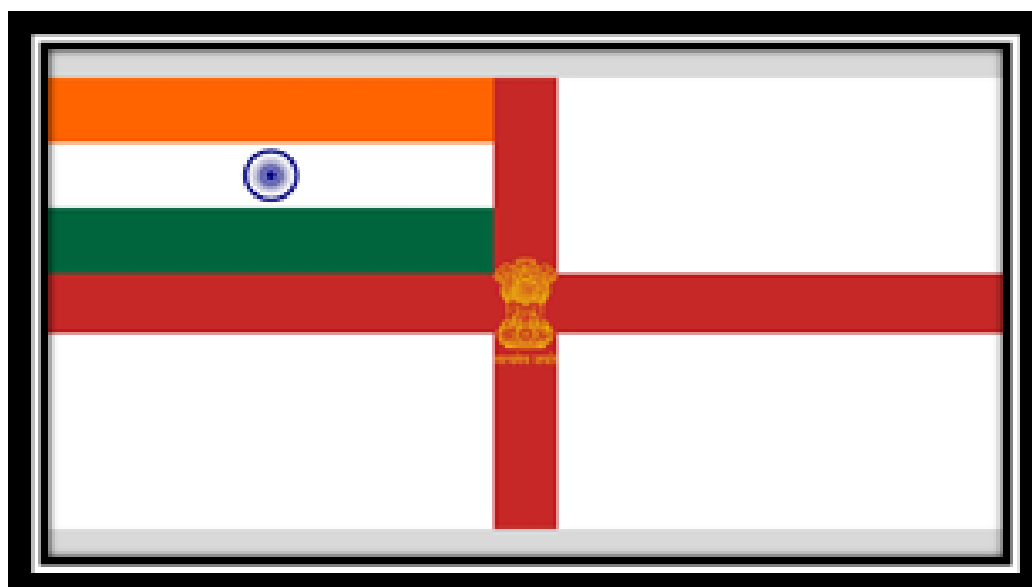

- Year 1947 to 1950

- Year 1950 to 2001

- Year 2001 to 2004

- Year 2004 to 2014

2<sup>nd</sup> September 2022 Indian Navy adopted this New Navy sign, with the national flag on the upper canton.

Blue octagonal shape encompassing the national flag a top, an anchor depicting the steadfastness and superimposed on a shield with the navy's motto "Sham no varuna" in Devnagri. The octagonal shape represents the eight direction reach and multi-direction operational capability, the octagonal shape with broad golden border, draws inspiration from the seal of the great Indian Emperor Chhatrapati Shivaji Maharaj.

As India celebrates it's 75<sup>th</sup> Independence, the navlan sign has stepped towards liberating the mind and further empowering the indomitable spirit of the sentinels about seas.

## THE INDIAN NAVY

# PARAM VIR CHAKRA

**Param Vir Chakra** is India's highest military decoration.

It is awarded for the most outstanding bravery or some daring or top ranking act of bravery or self-sacrifice in the presence of the enemy, whether on land, at sea or in the air. **The Param Vir Chakra** is a very rare honour . so far, it has been awarded only 21 times .

Fourteen of these awards were dead after a person's death

The medal itself is very simple in appearance .It is made of bronze, and is fitted with survival mounting and has a plain purple ribbon. On the obverse it has the Indian national emblem at the center, surrounding by on the reverse, the words **Param Vir Chakra** are engraved in Hindi and English, with two lotus flowers in between. The Param Vir Chakra medal was designed by Savitribai Khanolkar. She was an European lady, who married Vikram Khanolkar , an Indian Army officer.

*Miss Purvika Kasar  
Grade 2.2*

Hello, my name is Sanvi Kiran Jadhav. I study in Grade 6th. From a very young age I was fond of dancing. When my parents saw that I had an interest in dance. They decided to train me professionally so I began learning Kathak at the age of seven.

Kathak is one of the 8 classical dance forms of our country, which involves story telling through dance.

Kathak is famous in Uttar Pradesh, Bihar, Madhya Pradesh, Rajasthan, Punjab, etc. Instruments such as Pakhwat, Sarangi and Flute are accompanied. Pandit Birju Maharaj is known as the Guru of Kathak. I am always excited to learn something new when I go for my Kathak classes. Kathak has increased my confidence. It emphasises on poses, expressions, eye and body movement, footwork etc. Kathak makes us active and I suggest everyone should learn it.

*Miss Sanvi Jadhav  
Grade 6.3*

**Singing is my hobby. I am sure you would love to listen to me. So, click on the link given below to hear me sing.**

# Activities

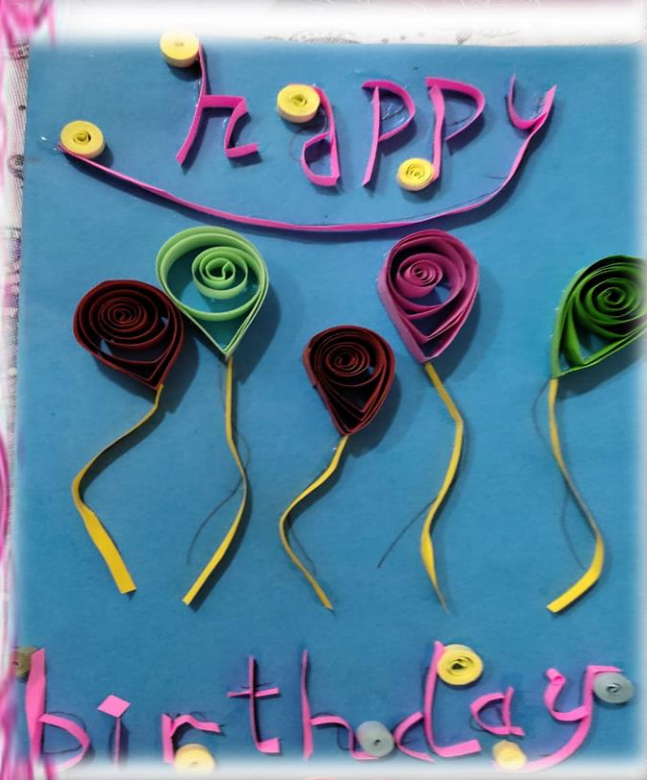

Hello Everyone, I am Sanvika Jairaj Patil. I am studying in grade 2-2. I Like to do several activities like writing stories, poem, messages, craft activity, painting, singing and dancing along with my studies. The most favorite activity of mine is to write stories and paragraphs. Here I have written one message to the GOD.

Dear God

"I know God you are very intelligent and powerful. God, you know about everything is going down there in the earth. Dear God bless us everyday and be with us always."

*Miss. Sanvika Patil  
Grade 2.2*

Hello everyone! I am Harvi Kapil Tanna. I am studying in grade 2-2. I like to do craft activities . I make new things in Quilling. I learned this activity in lockdown. Now I can make different types of greeting cards for my near and dear ones.

*Miss. Harvi Tanna  
Grade 2.2*

## *Best Out Of Waste*

Greetings,  
My name is Advait Shinde. I am from Grade 2-1 of St. Xavier's School. I am fond recycling waste and making new things. A few things I have made are - windmills,eco friendly ganapati Bappa.

Hello everyone, My name is Rudransh Patil. I am studying in class 2.2. I love listening and playing music. These days I am working on one English song name left to right by jungkook and Charlie puth.

*Mst. Rudransh Patil*  
*Grade 2.2*

# Water Dispenser Project

With the help of my elder brother, I have prepared home-made water dispenser unit which turn's ON & OFF the water flow using AIR Pressure available in Water bottle.

Below are the utilities I have used for this project,

- ❖ Water Bottle – Qty 1
- ❖ Empty Carton box – Qty 1
- ❖ Steel Glass – Qty 1
- ❖ Plastic Straw – Qty 1
- ❖ Two-way sticky Paper
- ❖ Sticky Glue
- ❖ Plain Water Paper
- ❖ Drawing Colors

*Mst. Prasanna Sonawane

used water bottle recycled by the students of  
**Grade 3-3**

# Mangalore Cucumber Plant

Cucumber is a vegetable.

It is green in colour. It is a very healthy.

It has a high content of water.

It is related to melons, squashes and pumpkins.

Cucumber is a vegetable that people often make into pickles.

It is a good source of vitamins and minerals.

The scientific name of the cucumber is 'Cucumis sativus'.

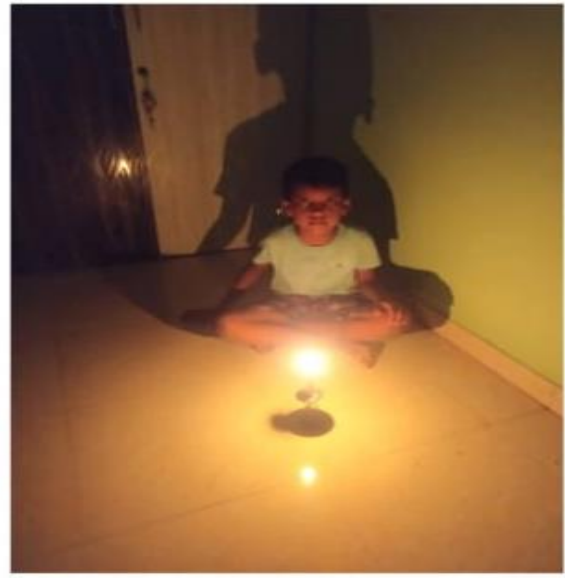

People grow cucumbers all over the world. In colder places cucumbers grow in greenhouses. In milder places they grow in fields or in home gardens.

*Grade 3-3*

**Do what's right, turn off the light!**  
 Environmental week Celebrated by  
 the students of Grade 3-3

When Teacher announced our school trip to Traffic Park, I was excited.

I prepared a small bag with some snacks, juice and water.

We all gathered in the class room and Teacher announced that we all would leave at 9:00 a.m. and return at 11:00 a.m.

We boarded the bus from the school and reached at Traffic Park. We all got down from the bus one by one and started to walk. We all made line and stood in a queue. There were many things to do here.

The Traffic Uncle told us everything about the Traffic Signals, zebra crossing and many other traffic rules.

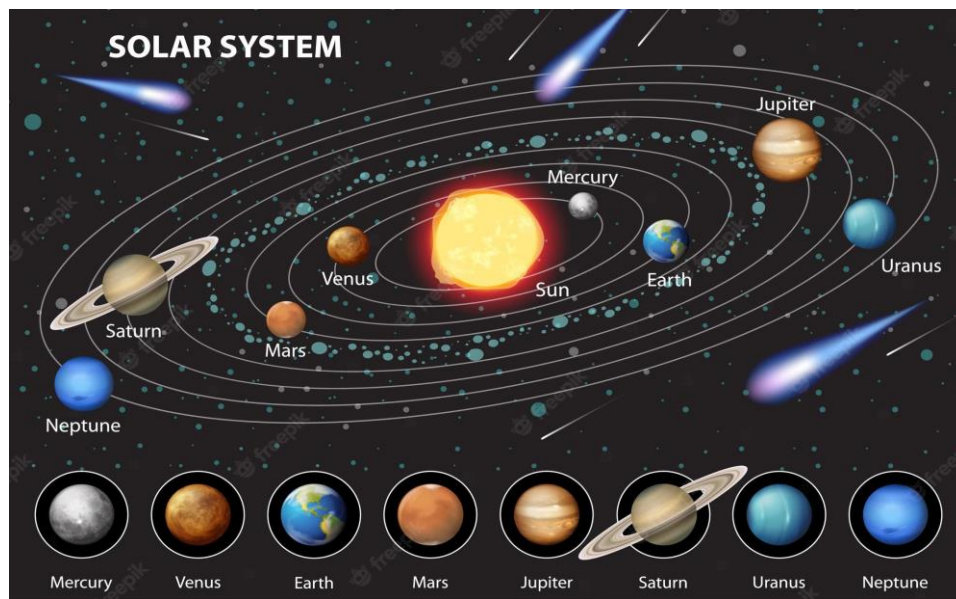

The Traffic Park is equipped with traffic signals, road signs and road crossings and thus we all students enjoyed learning about the various road safety rules.

We got detailed knowledge about the traffic rules, the traffic signals and the zebra crossing, we were moved to a small room with a projector, here we saw short videos on safety measures, road signs and rules here we came to know why we have to wait at the signal and follow all the rules.

After the enlightening session we all were served with Frooty and Biscuits.

Overall, it was an amazing learning experience. We all enjoyed this trip and were back in school in time.

## OUR AMAZING SOLAR SYSTEM

Once there was a big gas ball made of a hydrogen and helium. Then one day the ball exploded and a giant gas ball was formed and it wasn't an ordinary ball, it was a star and now people call it the SUN. There were millions of comets and asteroids and they were crashing into each other and this is how planets were formed. They were Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune and Pluto. But now Pluto is not a planet, a planet needs three things to be a proper planet.

1. It needs to be a round
2. It should move in an orbit
3. Finally it needs to clear everything in its path.

Now Pluto is round, has an orbit but Pluto doesn't clear everything in its path. That's why Pluto is not a Planet. Now Mercury is the smallest planet. Venus is the hottest planet with a temperature of 369+ degrees Celsius. Earth is the only planet which supports life. Mars is also called the Red planet. Now comes the asteroid belt which has many comets. Then comes Jupiter the largest and also called the king of all planets, its mass is more than the double of all planets combined. Saturn is the most beautiful. Uranus spins on its sides. Neptune is the coldest. Now and finally is the cyber belt, it contains of comets and the dwarf planets. Example Pluto and Aires.

बादल

मेरा कोई धर्म नहीं,

मेरी कोई जाति नहीं,

निःस्वार्थ भाव से सृष्टी की

सेवा करता हूँ,

मैं बादल हूँ, मैं बादल हूँ।

चाहे हो मंदिर की ईटें ,

चाहे हो मस्जिद की दीवार,

अपने जल से धोकर

चमकता हूँ,

मैं बादल हूँ, मैं बादल हूँ।

चाहे हो निर्धन क्यारी ,

चाहे हो राजा की फुलवारी

बूँदों के मोती गिराकर

हरा बनाता हूँ ,

मैं बादल हूँ, मैं बादल हूँ।

Potdar  
Grade 7.2*

# IMPORTANCE OF SCHOOL

School life is very important part of one's life, because it provides opportunity for studies and discipline. Besides these, the school life is a preparatory stage for entering public life.

School plays an important role in widening the outlook of students. Such as perseverance, sincerity, tolerance, discipline and obedience are developed in pupils. School provides opportunity to the students to be discipline in class rooms, playground, hostel, library and at other places.

School is a meeting place of students and teachers. From here a student learns how to adjust himself with the society at later part of life.

The school life is generally a period of youth. In school, all the students read in a spirit of togetherness. They forget their joys and sorrows. They read together, play together and sit together. In these days their minds contain some dreams which come true as they grow up in age.

The teacher acts as a guide and guardian to guide them on the right path. In school, teachers try to remove the evils from the students, by sowing some seeds of good qualities in them.

School has definitely a healthy influence on students. But some students indulge in a bad company and get away from the impact of their teachers. Those students miss the charm of their school life.

Lastly, school is a place to develop and grow. It provides character and imparts moral beliefs.

*Mst. Riyan D'Souza*  
*Grade 5.1*

# How was Paper Invented

We all know that paper plays a very important role in our lives. No doubt it is mostly used for writing. In our craft we use paper of different colour, sizes and shapes. But do you want to know the history behind paper? Let me enlighten you.

Paper was invented in 105ce in China. Fasmuls, silk shreds were used as paper. Paper was invented by Tslai Lun at the place Lei Yang. Ts laimixed mulberry, hemp and rags with water mashed into pulp, pressed in orders to remove liquid and h-ung the thin pressed mat to dry in the sun. Now you know how paper was invented.

*Mst.Samik Bhatia*  
*Grade 5.3*

# How to weed out Corruption

Corruption, corruption, corruption Everywhere.

“O God!! You remove corruption”, says the Man.

“I have given you everything”, says the Lord.

“You remove the corruption”, commanded the Lord.

Scratching his head, the Man went to the students and said,

“Stop telling lies, don’t copy in the examination, obey your parents etc....”

The students turned back and said rudely, “you mind your own business.”

The Man with a heavy heart went to different department and pleaded with the staff, “Don’t take bribe, don’t tell lies, don’t misuse your position, make the earth a heavenly place.”

The staff roared and reprimanded the man and said, “Don’t interfere in our job.”

With a broken spirit, the man knelt down and cried loudly to the Lord, “O Lord, I thank you for everything that I have under gone I lay everything at your fact. I’m trying and trying and trying.....

But in vain.”

The Lord said, “Don’t worry, Man everything will be in its place,”

Little by little the students improved, the conscience pricked the staff’s heart, changes came in waves.”

The Man said, “Everything is possible in prayer. Pray, Pray without ceasing.

## AMAZING FACTS

1. The word “muscle” comes from the Latin term meaning “little mouse”.
2. Cows can sleep while standing.
3. A group of alligators is called a “congregation”.
4. A rainbow has 7 shades. Red, Orange, Yellow, Green, Sky Blue, Dark Blue and Purple. But we can only see Sky Blue, Red and Orange shades in real.

*Miss Avira Sangale  
Grade 5.2*

As we use refrigerator to keep our food preserved, then in earlier times which device kept food preserved?

In order to keep food cool, ancient people stored them in ice pits. This was done 4000 years before.

Insulated cabinets for keeping ice or in other words, domestic refrigerator first came to existence around 1850 in the United states. In 1879, a German engineer 'Karl Von Linda' developed first mechanical refrigerator which was powered by a steam pump.

Within 12 years about 12,000 refrigerator were sold in United states and Germany. Two Swedish engineers, 'Von Platen' and 'Munters' developed the first electric refrigerator which went on scale in 1925. The main principle that on which it worked was compression and absorption. Compression and absorption system cools by alerting a refrigerator from a liquid state to gaseous state and back into liquid form. The refrigerator has a storage tank filled with 'Freon' gas, the refrigerant control device, the evaporator, compressor and condenser.

*Mst. Shreepad Sali*  
*Grade 7.2*

1. All the ants on Earth weigh about as much as all the humans.

The total population of people who are alive on Earth hasn't even hit 8 billion. At the same time, there are 10 quadrillion (10,000,000,000,000,000) individual ants crawling around at any given time. When combined, all of those ants would weigh about the same as all of us humans.

2. More people speak Mandarin Chinese than any other language.

With around 950 million native speakers and an additional 200 million people speaking Mandarin Chinese as a second language, it's the most widely spoken language in the world.

3. There's a website that tracks the world's population in real time called the 'World Population Clock'.

4. There are 43 countries that still have a royal family.

In total, there are 28 royal families who rule over a total of 43 countries around the world, including Britain, Japan, Spain, Swaziland, Bhutan, Thailand, Monaco, Sweden, the Netherlands, and Liechtenstein.

5. It's estimated that Sweden has more islands than any other country.

With 221,800 islands, Sweden is thought to have more islands than any other country in the world. Only about 1,000 of them are inhabited.

6. South Sudan is the youngest country in the world.

South Sudan in North Africa *just* gained its independence from Sudan in 2011, which currently makes it the youngest country in the world.

7. Only two countries use purple in their national flags.

The flag of Nicaragua features a rainbow in the centre that includes a band of purple, while the flag of Dominica boasts a picture of a sisserou parrot, a bird with purple feathers. These elements make them the only two flags in the world that use the colour purple.

8. People who are currently alive represent about 7% of the total number of people who have ever lived.

The number of people alive today represents a whopping 7% of the total number of humans who have ever lived.

9. The coldest temperature ever recorded was -144 degrees Fahrenheit.

The temperature was recorded in Antarctica. Just a few breaths of air at that temperature would induce haemorrhaging in your lungs and kill you.

10. Canada has 9% of the world's forests.

Canada has 9% of all of the forest area in the entire world.

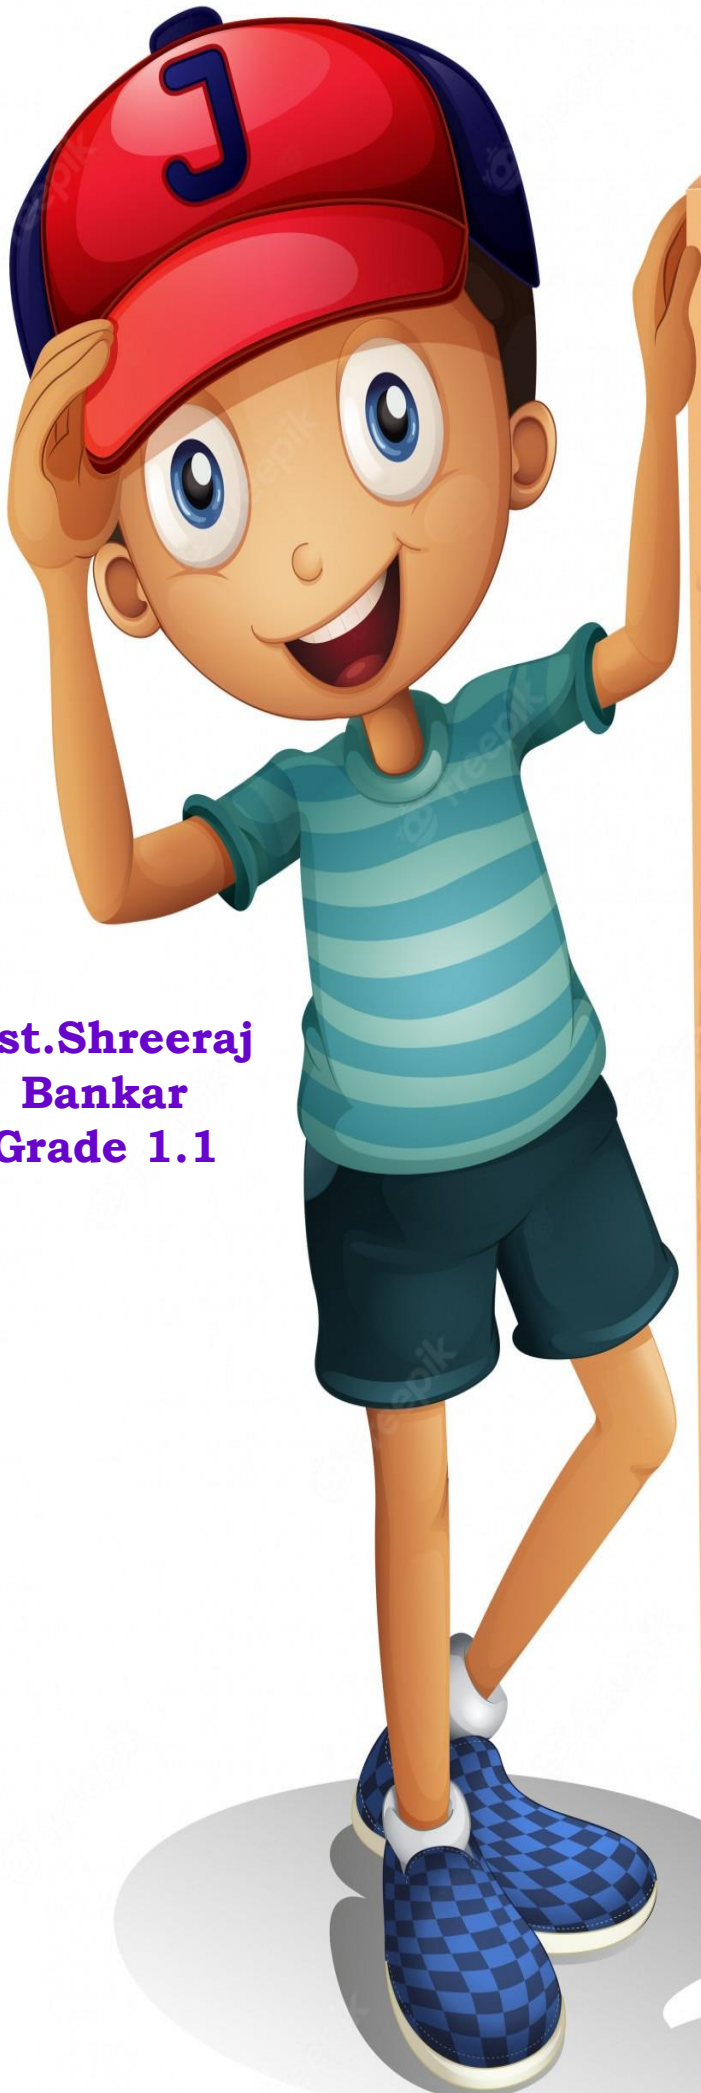

A young girl with brown hair in pigtails is smiling and looking towards the camera. Her face is partially covered with colorful handprints in shades of blue, yellow, and orange. She is wearing a white lace-trimmed top. The background is a vibrant pink wall with various art supplies scattered on it, including a green plant in a vase, a green highlighter, a blue highlighter, a black pencil holder with colorful pencils, a pair of green scissors, and several colorful paper clips. In the foreground, there is a blue wooden table with a pink sheet of paper, a pair of blue scissors, and a stack of colorful markers. The overall scene is bright and creative.

*Grade 2.2*

# **Princess Tiana**

Once upon a time, in the kingdom of Philadelphia, lived a kind, loving and beautiful princess named Tiana. Her mother was jealous of her growing popularity. Her mother, Queen Mary ordered one of the soldier to take Tiana deep into the forest and leave her there alone. The soldier obeyed the queen and took Tiana deep into the forest. While Tiana was busy plucking flowers and playing with animals, the soldier ran away quickly. After a few hours, Tiana realised that it is dark and the forest is known to be haunted. Tyana heard the roaring of lion and laughing of hyena. She began to run. After running for a while, she came to a castle. The watchman of the castle, Andrew Caprio asked Tiana, "Good evening young lady! What are you doing in this forest?" Tiana told everything, how her soldier left her, how she heard the voices of animals and all. The watchman said, "Very well! Now, you don't need to worry. You're safe with us." Tyana was relieved when she heard this. Than the watchman called his daughter, "Rose dear, come out and greet our guest! Just then, a short girl, looking like a fox came out of the castle. Tiana bowed and said, "It's a pleasure to meet you, Queen Rose!" Rose laughed and said, "I am not the queen. The legend that this castle was ruled by a handsome prince named Prince Charles. But happiness didn't last long. His enemies came and attacked him with poisonous thorns. His mother and father lay him on the bed and soon after they died.

If we remove the thorns out of his body, he will be alive.” Tiana exclaimed, ” Is it true! Then we must remove the thorns.” As they went inside the castle, they found the Prince’s room and found the prince lying on the bed with thorns all over his body. Rose thought, ” If I remove the thorns of his face, when he will Wake up, he will see me for first And we’ll think that I saved his life. And then he will ask me to be his queen.” Thinking so, she said, ” Tiana, can you remove the thorns of his feet while I remove of his face.” Tiana agreed. Both of them begin to remove the thorns. The towns of his feet word poisonous so they were removed. Rose went out to bring some water so Tiana quickly removed the poisonous thorns. As soon as they were removed Prince became alive. As rose had went to bring some water there was no one in the room except for Tiana. Prince Charles thought that Diana saved his life so he thanked and asked her, ”Would you like to Mary me.” Tiana said, ”Yes!” And they lived happily ever after.

# प्यारी तितली

कल शाम को बाग में, मैंने एक तितली को देखा | उसकी प्यारे प्यारे रंग बिरंगे पंखों को देखकर, मैं उसकी तरफ सम्मोहित होने लगा | ऐसा लग रहा था मानो वह तितली मुझे अपने साथ खेलने के लिए बुला रही है | मैं उसके पीछे पीछे उसको पकड़ने के लिए दौड़ता रहा | तितली कभी इस फूल पर, कभी उस फूल पर बैठ रही थी | मैं भी कभी पेड़ के पीछे छुप कर तो कभी झाड़ियों के पीछे छुप कर उसको पकड़ने की कोशिश कर रहा था , और वह तितली उड़ कर दूसरी जगह भाग रही थी |

मैं उसको पकड़ने की कोशिश करते करते थक गया था | ऐसा लग रहा था, मुझे हर हाल में तितली को पकड़ना ही है | अचानक से मेरे मन में विचार आया कि मैं तितली को पकड़ ही क्यों रहा हूँ ? मैं अपने ऊपर ही हंसने लगा | मैंने सोचा मैं तितली के साथ उड़ भी सकता हूँ | मैं कोशिश करने लगा | कभी हाथ फैला कर इधर भागता, तो कभी उधर भाग रहा था | मैं बहुत प्रसन्न था | बगीचे में बहुत सारी तितलियाँ थी और मैं बहुत प्यार से उनके साथ, अपने ही धुन में खेले जा रहा था |

अचानक बगीचे में एक बड़ा जानवर आया | मैं उसको देखकर भागने लगा | भागते भागते मैं एक तालाब में गिर गया | मेरे सारे कपड़े गीले हो गए | अचानक से मेरी नींद खुल गई और मैंने देखा कि मेरे कपड़े वास्तव में गीले हैं | मैं और भी चकित हो गया कि मैं सपने में पानी में गिर गया था और मेरे कपड़े वास्तव में कैसे गीले हो गए? तब मैंने पाया कि मम्मी ने मेरे ऊपर पानी छिड़का है ,मुझे उठा कर स्कूल जाने के लिए |

# THE PRANK

There was a boy named Sam, he used to play pranks on everybody. He was from a family of farmers. One day he thought of playing a prank on all the villagers. He said that a fox had killed all the sheep and had eaten them. But one day when his cat was really killed by a fox, none of the farmers helped him in his bad time.

## **Moral:**

We should not play pranks on anyone.

# TRUE FRIENDSHIP

A long time ago, in a big town there were two best friends called James and Jack .One day they decided to go in the forest for a walk and came back in the evening. They also promised that they will be together if any danger comes against them. They both started walking in the forest, suddenly they saw something coming towards them. It was a big black bear. James climbed up the tree, Jack was there alone standing in front of the bear. He was lying on the ground. The bear just saved the boy and he whispered something into Jack's ears and went away. When Jack opened his eyes, James asked him "What the bear said into his ears? "His friend replied, "A true friend will always be with you in any situation".

Moral of the story:- A true friend is the one who stays with you in any situation.

# A visit to Mount Abu

I want to give you some information about Mount Abu, where we had visited in the month of May 2022.

Mount Abu is a hill station and has a green oasis in the barren desertscape which is located in Rajasthan. It is situated at the southern tip of the Aravalli Range. The loftiest peak of Aravalli hills is about 15 km. To climb this peak there is a concrete road on which vehicles can also run. This summit is 5,653 feet high above the sea level. It is known as 'Guru Shikhar' which is the highest peak of the Aravalli hills. Me and my family were staying near Nakki Lake which is surrounded by green hills and is an unique centre of attraction. It is believed that a sage named Balam Rasiya dug it out with his nails (Nakh) so the lake was named 'Nakhi Lake' and later it became 'Nakki Lake'. Dilwara Temple is a world famous Jain Temple, which has an excellent specimens of sculptures and art. We visited many worthwhile places of Mount Abu.

Such as, Achalgarh, Shankar Math, Sunset Point, Arbuda Devi Temple and Honeymoon Point. It is called Honeymoon Point because of the existence of a rock here that resembles the shape of a man and woman. It was an amazing tour where I could spend three days with my parents. If one loves nature then visit to Mount Abu will be the best place and surrender oneself to nature.

मी डॉक्टर झालो तर !

लहान बाळ जन्माला आल्यापासूनच त्याचे आई- वडिल तो मुलगा मोठा झाल्यावर खूप शिकून देशाचे नाव उज्वल करेन असे विचार करत असतात. मी शाळेत गेल्यापासून अभ्यासातून बऱ्याच गोष्टी शिकलो आणि मी ठरविले की मला मोठे होऊन डॉक्टर बनायचे आहे.

संपूर्ण जगामध्ये कोरोनाची साथ आली आणि खूप लोक आजारी पडून मृत्युमुखी पडली. कारण कोरोना या आजारावर काही औषधच नव्हते. दोन वर्षे शाळा, ऑफिस व इतर ठिकाणे बंद होती परंतु लोकांचा जीव वाचविण्यासाठी डॉक्टर, नर्स आणि हॉस्पिटल काम करत होते. तसेच मला लहानपणापासूनच डॉक्टर होण्याची इच्छा होती परंतु या कोरोनाच्या काळात मला मनापासून डॉक्टर व्हावेसे वाटत होते.

मी डॉक्टर झालो तर सर्वात प्रथम माझ्या आई - वडिलांना खूप आनंद होईल कारण त्यांचे स्वप्न आहे की, मी मोठे होऊन डॉक्टर व्हावे. माझे वडिल आदिवासी भागामध्ये काम करतात. तेथे अनेकदा आजारी लोकांचा मृत्यु हा वेळेत औषध न मिळाल्यामुळे होत असतो. मी डॉक्टर झाल्यानंतर शहरापेक्ष्या अशा आदिवासी भागामध्ये काम करेन. तेथील लोकांना चांगले आरोग्य मिळण्यासाठी प्रयत्न करेन. तसेच काही लोकांचा जीव हा त्यांच्याकडे पैसे नसल्यामुळे, डॉक्टरांची फी जास्त असल्यामुळे जातो. मी अश्या लोकांचा इलाज कमीत - कमी पेश्यात करेन.

जगात कोरोनाची साथ आल्यावर खूप सारे डॉक्टर, सायंटीस्ट हे त्याच्यावर औषध शोधण्याचा प्रयत्न करीत होते. मी सुद्धा डॉक्टर झाल्यावर निरनिराळ्या आजारांवर औषध शोधून समाजाची मदत करून सर्वांचे प्राण वाचवायचे आहे.

जे काही पैसे मला मिळत जातील त्यातून काही पैसे मी गावांमध्ये हॉस्पिटल बांधण्यासाठी उपयोग करेन. अनेक आश्रम बांधेन जेथे लोकांवर कमीत कमी पेश्यामध्ये इलाज होईल. डॉ. बाबासाहेब आंबेडकर नेहमी सांगायचे की, भारतात जास्तीत- जास्त हॉस्पिटल बांधले तर नंतर मोठ्या आजारांवर उपचार करता येतील. हॉस्पिटल ची जास्त गरज आहे. आपल्या भारतातील खूप लोक अमेरिका किंवा इतर देशामध्ये उपचार घेण्यासाठी करण्यासाठी जातात. मी इतका चांगला डॉक्टर होईल की अमेरिका आणि दुसऱ्या देशामधून लोक भारतात उपचार घेण्यासाठी येतील. मी डॉक्टर झाल्यावर इतर मुलांना ही डॉक्टर होण्यासाठी मदत करेन, ज्यामुळे आपल्या देशात डॉक्टरांची कमी राहणार नाही. डॉक्टर झाल्यावर ज्या - ज्या गोष्टींचे मला ज्ञान मिळेल ते सर्व मी एका पुस्तकात लिहून ठेवेन. त्या पुस्तकाचा वापर सर्व विद्यार्थी अभ्यासासाठी करतील.

मदर तेरेसा, बाबा आमटे, प्रकाश आमटे यासारख्या अनेक महान लोकांनी आजान्याची खूप सेवा केली. डॉ. प्रकाश आमटेंनी आदिवासी पाड्यात राहून त्या लोकांची खूप सेवा केली. मला देखील डॉ. प्रकाश आमटे, मदर तेरेसा यांची प्रेरणा घेऊन मी एक दिवशी खूप मोठा डॉक्टर बनून माझ्या देशाचे नाव उंच करील. यामुळे देशाला आणि माझ्या आई-वडिलांना माझा गर्व वाटेल आणि ज्यावेळी डॉक्टरांची संख्या आपल्या देश्यात जास्त होईल, त्यावेळी कुठलाही माणूस औषधविना आणि पैसे नसल्यामुळे मरणार नाही. आजान्याची सेवा करणे म्हणजे देवाची सेवा करणे होय. मी डॉक्टर झाल्यावर मला, माझ्या आई-वडिलांना आणि आपल्या देशाला खूप मान मिळेल.

# OZONE (0-3)

Ozone or trioxxygen is an organic molecule with the chemical formula  $O_3$ . It is a pale blue gas with a distinctively pungent smell.

Ozone is formed from dioxygen by the action of UV rays and electrical discharges within the Earth's atmosphere. It is present in very low concentrations through out the latter, with its highest concentration high in the ozone layer of the stratosphere, which absorb most of the Sun's Ultra Violet radiation.

Ozone layer is a layer of molecules of Ozone present around the Earth. The layer acts like a blanket and protects the Earth from harmful UV rays emitted from the sun. Without Ozone layer the harmful UV rays will directly come to the surface of the Earth. UV rays can damage our planet, plants, humans and animals. Ozone layer is very important for life and natural balance on the Earth. Now a days several holes have been found in it which is not a good sign.

This is due to environmental degradation and rise in temperature. Planting trees, using eco-friendly goods can help to save the Ozone layer. We should spread awareness about protecting the Ozone layer. Ozone is considered as a pollutant also. Ground-level Ozone comes from pollution emitted from cars, powerplants industrial boilers, refineries and chemical plants. Ozone pollution can even come from paints, cleaners, solvents and motorized lawn equipment.

Ozone can damage tissue of the respiratory tract, causing inflammation and irritation and result in symptoms such as coughing, chest tightness and worsening of asthma symptoms. In addition, Ozone causes substantial damage to crops, forests and native plants.

To decrease the product of Ozone in ground level we should choose public transportation, walking or biking instead of travelling in cars is a good step. If you wait until evening to refill your car or mow your lawn, it's unlikely that the pollutants released will become Ozone. The world Ozone Day is celebrated on 16th September every year all over the world.

# ACID BASE REACTION

One sunny afternoon I was bored and I thought that let's do something magical and innovative. So I did an experiment and I want to share it with you all.

**Ingredients**: A glass of water, one teaspoon turmeric powder, one teaspoon detergent powder and one teaspoon lemon juice.

**Procedure** : Frist put some turmeric powder in a glass of water, the water will change into yellow colour. After that put some detergent powder in the water, and the water will change from yellow to red. Now put some lemon juice in the water and the water will change again into yellow.

**Conclusion**: Detergent powder has base hence the colour changed with turmeric powder's reaction. After addition of lemon juice colour became yellow because lemon juice is Acidic in nature, hence acid and base reactions occur and became natural reaction.
